Introduction

What is Lyricue?

Lyricue was previously know as Lyricue (which stood for Lyric Display System.)
It is a computer-based replacement for the overheads used to display song lyrics in events such as church services.

Who was Lyricue written for?

Lyricue was originally written for use at Gosford Baptist Church in Gosford, Australia.
It was designed for use in Churches and so has features specific to Church usage.

Who was this guide written for?

This guide has been written for people who wish to use Lyricue and assumes that Lyricue has already been installed and is in a working state.
It's target audience is the average non-technical user.

Using Lyricue

Starting the Interface and Server

The exact way you start Lyricue may vary depending on how it has been setup but basically you need to run `/usr/bin/lyricue` on your main display and `/usr/bin/lyricue_server` on the display that is going to your projector.
